

Quick Start

Juniper Security Director 25.4.1 Quick Start

IN THIS GUIDE

- Step 1: Begin | 1
- Step 2: Up and Running | 2
- Step 3: Keep Going | 6

Step 1: Begin

IN THIS SECTION

- Deploy Juniper Security Director | 2

You can install Juniper Security Director on-premises and manage SRX Series Firewalls and vSRX Virtual Firewalls through a centralized web interface. This guide walks you through installing Juniper Security Director, onboarding your devices, and configuring Juniper Security Director to manage your devices.

NOTE: To access earlier versions, use the drop-down selector menu on the [Juniper Security Director Documentation](#) page.

Here's the high-level order of installation and device onboarding workflow.

Deploy Juniper Security Director

Table 1 on page 2 provides the the deployment options for Juniper Security Director.

Table 1: Supported Deployment Options

Deployment option	Refer
Deploy Juniper Security Director Using VMware vSphere	Juniper Security Director Installation and Upgrade Guide
Deploy Juniper Security Director Using KVM	Juniper Security Director Installation and Upgrade Guide

Step 2: Up and Running

IN THIS SECTION

- [Create Organization Account and Add Devices | 3](#)
- [Associate Devices with Your Juniper Security Director Subscription | 5](#)
- [Verify Configuration on Adopted Devices | 5](#)

Create Organization Account and Add Devices

Before You Begin

The following ports must be opened:

- Inbound port 443 for users' connection to Web is associated to the UI virtual IP address.
 - Outbound port 25 for outbound to configured mail server is associated to the Management IP address.
 - Inbound port 7804 from all managed devices is associated to the device connection virtual IP address.
 - Outbound port 443 for signature download URL is associated to the Management IP address.
 - Inbound port 6514 for inbound connection for traffic log is associated to the log collector virtual IP address.
1. Enter the UI virtual IP address or FQDN (domain name) in a browser to access the Juniper Security Director login page. Follow on-screen instructions to create and activate your account. For details, see [Log In to the Juniper Security Director Web UI](#).
 2. Login to Juniper Security Director, click **Add Subscriptions**. You can also use a 60-day trial subscription that is available by default.

3. Enter a name for the subscription and select either of the following options:
 - a. **Copy-and-paste license details**—Copy license key and paste in the **License** field.
 - b. **Upload license file**—Click **Browse** and navigate to the license.txt file. Click **Open**. Please note you can upload only .txt file.
4. Click **OK**. You can view your added subscriptions from **Admin > Subscriptions > SRX Management Subscriptions**. If you do not see your subscriptions, go to **Admin > Jobs** page to view the status.
5. Select **Inventory > Devices**, and click the + icon to add your devices.

NOTE: To know about supported devices, see [Juniper Security Director Supported Firewalls](#).

6. Click **Adopt SRX Devices** and select one of the following:

- SRX Devices
- SRX Clusters
- SRX Multinode High Availability (MNHA) Pairs

Add Devices ?

Adopt SRX Devices
Copy commands generated by Security Director and paste to the SRX devices.

Type

☒ SRX Devices

☐ SRX Clusters

☐ SRX Multinode High Availability (MNHA) Pairs

Adopt SRX devices by copying commands generated by Security Director and pasting them to the SRX devices.

To adopt SRX devices, perform the following:

1. Enter the number of SRX devices you want to adopt and click OK.
2. On the Devices page, click Adopt Device in the Management Status column, copy-paste the commands and commit them to the SRX devices.

Number of SRX devices to be adopted

Supported Junos OS Release: 18.4R3 or later

Cancel
OK

Follow the on-screen instructions to continue. For details, see [Add Devices](#).

7. Copy and paste commands from the devices page to the SRX Series Firewall or the primary cluster device console. Then commit the changes. It will take few seconds for device discovery. After device discovery is successful, verify the following fields on the **Devices** page:
- **Management Status** changes from **Discovery in progress** to **Up**.
 - **Inventory Status** and **Device Config Status** changes from **Out of Sync** to **In Sync**.

NOTE: In case of discovery failure, go to the **Admin > Jobs** page and view the status.

Associate Devices with Your Juniper Security Director Subscription

1. Go to **Inventory > Devices** select the device, and click **Manage Subscriptions**. Follow the on-screen instructions.

Manage Subscriptions ? ✕

Number of devices selected 1

Subscriptions
Select a subscription below. You can also add new subscriptions by clicking [Add Subscriptions](#)

Subscription

- test
- Test-License
- Trial license 1

Cancel OK

2. Verify that **Subscriptions** column displays the subscription name for your device. Congratulations! You have successfully associated your device to Juniper Security Director.

Verify Configuration on Adopted Devices

Verify your device configurations in Juniper Security Director.

- Go to **Security > Security Policies** and verify the imported security policies.
- Go to **Network > NAT Management > NAT Policies** and verify the imported NAT policies.
- Go to **Inventory > Devices**, click **Security Logs Configuration**, and verify the security log configurations.

If you've set up security policy, NAT, IPSec VPN, and logs on the device, these configurations will be imported into Juniper Security Director.

Step 3: Keep Going

IN THIS SECTION
